

## PC-Cillin Internet Security

Protection from viruses, hackers, spyware, and phishing for home and small office

Trend Micro's PC-cillin Internet Security 2006 combines award-winning antivirus security and a personal firewall—for comprehensive protection against viruses, worms, Trojans, and hackers. It also detects and removes spyware and blocks spam. It even guards against identity theft by blocking phishing and pharming attacks. Plus, PC-cillin protects your wireless network with Wi-Fi Intrusion Detection, an innovative security feature that alerts you when an intruder uses your Wi-Fi connection

### Awards and Recognition

"I know of only one commercial product, Trend Micro PC-cillin Internet Security 2005, that monitors wireless connections, alerting you whenever someone new tries to join your network or your network changes suddenly. That's one reason PC-cillin is our current antivirus Editors' Choice."
